

# Chlorine granules

## For reliable and rapid water disinfection

### Application

Chlorine granules will disinfect your spa water reliably. The granules dissolve quickly and work rapidly at removing bacteria, turbidity and impurities in the spa water.

### Advantages

- Superior pearl quality
- Dissolves completely without residue
- pH neutral
- Dust free
- Stabilised chlorine, prevents fast chlorine degradation at higher temperatures or exposure to sunlight

### Product description

White micro spheres

Contains: 100 g of the product contains 100 g Troclosene sodium, dihydrate

### Dosing recommendations

Check the chlorine value at least once per week using SpaTime test strips, and if necessary adjust it to the optimum value of 1.0 – 1.5 mg/L. The dosage required will depend on the measured chlorine value. In order to prevent problems with the water treatment, make sure that there is chlorine present in the water at all times. After each use, add the chlorine granules directly to the spa water with the circulation pump running.

### Important information

This product should be used solely for the purpose specified.

**TIP:** Before adding the disinfectant, please check the pH value with SpaTime test strips. If necessary, adjust to the correct value of 7.0 – 7.6 to ensure the best possible efficacy of the chlorine granules.
